

Homework

Activity 1

Solve the proportions by finding the value of the variable.

1.  $\frac{y}{3} = \frac{6}{9}$

2.  $\frac{2}{5} = \frac{z}{20}$

3.  $\frac{3}{8} = \frac{27}{w}$

4.  $\frac{4}{n} = \frac{24}{54}$

Activity 2

Use the  $x/y$  tables to write an equation.

1. What is this function?

$x$	$y$
2	4
5	10
10	20
25	50

2. What is this function?

$x$	$y$
1	5
2	10
3	15
10	50

3. What is this function?

$x$	$y$
4	36
7	63
3	27
8	72

Activity 3

The dot graph shows the functional relationship between how much Tina gets paid and how much she works. Answer the questions using the graph.

- How much does Tina get paid for working 5 hours?
- How many hours does Tina work if she gets paid \$40?
- How much does Tina get paid per hour?
- If Tina worked 8 hours, how much would she get paid?

## Homework

## Activity 4 • Distributed Practice

Solve.

1.  $3x + 2 = 14$

2.  $-5z = 15$

3.  $-27 = 3y$

4.  $a + 16 = 17$

5.  $15 = b - 2$

6.  $3c = -24$

7.  $5d + 10 = 25$

8.  $-6e - 18 = -24$
